VAST Paper Summary

We plan to complete the whole revise work tomorrow. Till now, I can say that I try my best to take part and worth the title of the second author. The following is my job on this paper:

- 1 Process data of Wenzhou City and improve the initial algorithm code.
- 2 Propose the idea of iterative sampling and design the algorithm with the other master.
- 3 Complete the font-end layout and help for the overall realization.
- 4 Some back-end code.
- 5 Paper writing includes 3.3 System overview, 4.1 Flow Representation, pseudo-code, 5.1 case study
- 6 Video making

I worry about that my work is not enough for my title before, so I take part in the review actively. But because Mr. Zhou squeeze students too much, the other master quit for the review. So Mr. Zhou always push tasks to me continually, while he is not so understandable of the system or the technology.

I truly learned a lot from this contribution and did what I should do all the time. But I am worn out for the huge pressure. Hope tomorrow is the final day to review the paper. I don't want to cooperate with him anymore!
